

## **Paragent.com Launches Remote IT Management for MSPs**

SAN DIEGO, Calif., Sept. 8 -- Paragent.com today announced at the DEMOfall 08 conference a Web-based service for managed service providers (MSPs). The remote IT management toolset helps MSPs to easily and cost-effectively serve more customers. Paragent.MSP offers quick set-up and value-priced remote IT management tools enabling MSPs an affordable, yet powerful way to scale their businesses.

With plans starting at \$8 per computer per year, Paragent.MSP is aimed at MSPs whose target customers are small and medium-sized businesses. It is set apart from other offerings by its intuitive interface, simple installation and use, and powerful one-click remote desktop. Sign-up takes just a few clicks, and MSPs can be using Paragent.MSP in less than 10 minutes. Customers across the U.S. and overseas have been using the Paragent.com underlying technology for two years.

"Paragent.MSP gets high marks for usability, and the breakthrough pricing is disruptive to its market competitors," said Chris Shipley, executive producer of the DEMO conferences. "Paragent delivers a smart alternative that allows managed service providers to break the cycle of the break-fix status quo and substantially reduce the need for costly on-site customer visits. For these managed service providers, Paragent.MSP is a true business accelerator."

"For many MSPs, desktop management software is too expensive and too difficult to use. It sometimes requires new hardware, software and significant training time. On top of that, competitors charge as much as \$60 to over \$100 per computer to be managed. Paragent is refreshingly different. Paragent.MSP's goal is simple: we want to provide an intuitive, value-priced, use it out-of-the-box experience. Any MSP can now afford powerful remote desktop management that also has a 'green' component," says Tim Ritchey, Paragent.com co-founder and CEO.

About DEMO

Produced by Network World Events and Executive Forums, the semi-annual DEMO conferences focus on emerging technologies and new products, which are hand-selected from across the spectrum of the technology marketplace. The DEMO conferences have earned their reputation for consistently identifying

tomorrow's cutting-edge technologies, and have served as launch pad events for companies such as Palm, E\*Trade, Handspring, and U.S. Robotics, helping them to secure venture funding, establish critical business relationships, and influence early adopters. Each DEMO conference features approximately 70 new companies, products and technologies. For more information, visit [www.demo.com](http://www.demo.com).
